"Comparative analysis of the genomic structures and promoter activities of mouse Siaa2,3Galb1,3GalNacGalNacGa,6-sialyltransferase genes (ST6GalNAc III and IV): Characterization of their Sp1 binding.",

J. Biochem. 127:399-409(2000).

-I- FUNCTION: Involved in the biosynthesis of ganglioside GD1A from GM1B. Transfers CMP-NeuAc with an alpha-2,6-linkage to GalNac residue on NeuAc-alpha-2,3-Gal-beta-1,3-GalNAc of glycoproteins and glycolipids. Prefers glycoproteins to glycolipids.

-I- CATALYTIC ACTIVITY: CMP-N-acety1-neuraniate + N-acety1-alpha-
                                                                                                                                                                                                                                                                                                                                                                                                                                         This SWISS-PROT entry is copyright. alpha-N-acetylgalactosaminide alpha-2,6-sialyltransferase (EC 2.4.99.3) - chick C;Species: Gallus gallus (chicken)
C;Species: Gallus gallus (chicken)
C;Date: 30-Jun-1995 #sequence_revision 30-Jun-1995 #text_change 09-Jul-2004
C;Accession: A49880
C;Accession: A49880
T; Lee, Y.C.; Nakaoka, T.; Kojima, N.; Tsuji, S.
J. Biol. Chem. 269, 1402-1409, 1994
A;Title: Molecular cloning and expression of GalNAc alpha2,6-sialyltransferase.
A;Reference number: A49880; MUID:94117458; PMID:8288607
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          A;Cross-references: UNIPROT:Q92183; GB:X74946; NID:g453196; PIDN:CAA52902.1; PID:g453197 C;Superfamily: alpha-N-acetylgalactosaminide alpha-2,6-sialyltransferase C;Keywords: glycosyltransferase

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Total number of hits satisfying chosen parameters:
             Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
